PRESIDENTS MESSAGE

“My how time flies”, once again my opening statement. Meteorologically the summer has ended but based on the calendar we have days to go. Real sign is, kids are back in schools. The summer car show season has ended but the fall car show is already in full swing next weekend. Days are shorter but that just gives us more time to work under the lights in our garages on cars without the need for AC. Or, in my case work on other cars not currently in our club.

Once again I returned from WI with a bunch of rusty parts with the intent of restoring a Model T front end steering and suspension. Only to find I did not have long enough breaker bars nor large enough sockets to complete start the process. Here is the good part. A family member works with the wife and husband whom sold their house and needed to get packed and move out. Just the call I was looking for, I now own his grandfather's heavy-duty socket set from half inch all the way up to one and three eighths with a couple of breaker bars. Guys, engine cleaner and pressure washer multiple times finally removed decades out grease and gunk to transform them into a useable set of tools. I immediately put them to use and disassembled with ease. It just goes to show one, you got to have might and can accomplish anything.

More about happenings later. Let's get together for a scheduled meeting on September 17th for our first fall meeting at the Back Yard Bistro. Our intent is to have our members speak up about their summer adventures and share with the group.

See you then.

EDITOR'S OBSERVATIONS AND NOTES

By Randy N Robertson

1. I hope all your summer plans are working out well. Fall is just around the corner.
2. Linda and I were surprised with the early arrival of latest Grandson– Leo & Mother are doing well, gaining weight and we all hope to have him home soon. Hat's off to Rex & the Nurses!
3. Thanks to all for your contributions this last month.
4. Please contact me with anything you want published. rnewr2017@gmail.com

Per BCA member Mark Stamper:

Wake Tech Auto Body Restoration - a 2-month class.

When this session is done, at the end of Sept., another session will start.

The idea is to keep it running continuously.

I am working on my 55 Buick, getting some body work done, and eventually painting it.

There are a few more spots for the next class if anyone is interested.

The class is run by a couple of guys and you bring in your own project to work with. So, it's like renting a space for \$175 / mo., with professional help and spray booths.

The Wake Tech auto building is beautiful by the way. Hendricks Motorsports donated the money to build it.

You can also leave your car there while you are not working on it if you want in a gated area.

I have been having a great time. The class is Thurs, Friday evenings 6-10PM and Sat. 8a-2pm.

They might even add another day next session so people can flex a little if they need to.

It's not formal instruction, so the guys just float around and help. If anyone is interested, please let them know about it.

Contact the school for more information.
